

Warsaw, 26 November 2020

**DECLARATION**  
on the implementation of the Collective Protection Equipment Guidelines  
by the Signatories of the Agreement for Safety in Construction Trade Union

The set of collective protection equipment guidelines is a compendium of knowledge aimed at:

1. raising awareness of collective protection equipment for supervisors at construction sites and production workers,
2. improvement of the planning process,
3. reduction of dangerous behaviors.

The guidelines are supposed to be a tool supporting the proper planning process as well as a set of minimum requirements for subcontractors and suppliers of formwork/edge protection systems.

In connection with the prepared collective protection guidelines, we declare:

1. Time for implementing the guidelines - 12 months for new projects bid submitted after 1 January 2021.
2. Mandatory application of the guidelines from 1 January 2022 by all members of the Agreement for Safety in Construction.

Adopted for implementation

**The Agreement for Safety in Construction**
